We will not.

We need a time line of who is going to be reaching out to whom and when for this (ie tribal notification, Governor's office, etc.).

Are you talking comm strategy? The one we sent you last week -- which did not account for our own data release, only USGSs -- is the most current we've produced.

I will be looking to R8 team this afternoon -- ie. Ayn Schmit -- to get updates on the latest EPA data release document language. We'll need some of that to update the CS for messaging re: our own data.

I see your desk statement from earlier. Does that mean we won't be doing a press release and will be using a statement as calls come in?

Could you send along the latest when you have a chance? Folks are asking to see one.

Bo
